Professional Experience

Front-End Developer at DeliveryMuch   2017 - 2020
Developed and maintained web and desktop applications used by over 2 million users.
Closely worked with the Design team to monitor, create, and improve all user interfaces.
Managed novice Front-End Developers and reviewed resumes and job application tests.

Front-End Developer at NTE   2015 - 2017
Worked with a cross-functional team to develop distance learning solutions.
Developed NTE's main web portal using PHP and Joomla.

Web Developer at CTISM   2013 - 2015
Maintained and supported legacy projects and developed new applications using MySQL, PHP, HTML, CSS and Javascript.

Side Projects

UI Design Challenges
As a hobby, I take on UI challenges to better understand and code usable components with CSS and HTML. Find the challenges on my Codepen profile.

Hacktoberfest Open source community
Participated in 2019 and 2020 events to contribute to open-source projects such as zButtons and reviewing jobs application tests.

League of Dates web application - 2015
Coded a web application using League of Legends API to create a tool to find people who play in the city you live.

Teaching

HTML and CSS for Designers - Workshop instructor - 2019
Created and taught an introductory course on HTML and CSS for undergraduate and graduate students from the Federal University of Santa Catarina.
